The history of Japanese engineering is a long one, and has seen the country take up a position in the forefront of most forms of technical engineering, not least with respect to technology. Mechanical: The base engine in the 2008-2013 Lancer is the 2.0L DOHC MIVEC 4-cylinder (MIVEC = variable timing) engine rated at 152 horsepower (later changed to 148). A stronger 168-hp 2.4-liter motor was added for 2009. Transmission choices include a 5-speed manual or a continuously variable transmission (CVT).
